

## High Income Alternative Note

The High Income Alternative Note was created to answer a market demand for high-yielding, liquid and sophisticated strategies. It focuses on areas where the capital supply is scarce that offer high and stable returns for investors: Factoring and short-term credit opportunities.

2017							0.45%	0.81%	0.46%	0.51%	0.69%	0.63%	3.60%

Past performance should not in any circumstances be taken as an indication of future performance. Investors and prospective investors should refer to the official documents of the Note, including the Series Memorandum, for further information about the risk of investing in this investment fund.

### TARGET ALLOCATION

#### Credit Opportunities

Senior-secured short-term loans to small and medium-sized enterprises.

#### Factoring

Diversified portfolio of corporate receivables.

Stephane Prigent, CFA  
CEO

## ABOUT KATCH INVESTMENT GROUP

Katch Investment Group ('KIG') is a dynamic asset management boutique offering innovative investment solutions in a constantly changing and challenging financial market environment. In the aftermath of the global financial crisis, major central banks' liquidity injections have inflated traditional asset classes, while new regulations reduced the banks' appetite and capability to lend to smaller businesses.

Laurent Jeanmart, CFA  
Chairman

KIG identified these trends and decided to launch a note that invests in short-term lending and financing opportunities. It focuses on areas where the capital supply is scarce that offer relatively high and stable returns for investors, such as factoring, and other credit opportunities.

Pascal Rohner, CFA  
CIO

The note is registered in Ireland and partners with recognized financial institutions. It is managed by Stephane Prigent (Ex-Managing Director & Global Head of Equity Sales Research at State Street Capital), Laurent Jeanmart (Ex-head of Investment at Platinum Capital & Ex-CIO at Fidelis Insurance Holdings), and Pascal Rohner (Ex-CIO at Private Investment Management & Ex-Credit Suisse).

The note targets a total return of 9% in USD, with a dividend of 6% p.a. paid on a quarterly basis.

## PORTFOLIO REVIEW

The performance has remained robust in February, which is another evidence of the portfolio's non-correlation to traditional asset classes. The outlook remains positive as we are allocating more capital towards opportunistic direct lending, mainly in Europe, where we have identified plenty of potential new borrowers that are seeking funding for real estate acquisitions and other short-term business opportunities. They are typically willing to pay double-digit interests while offering solid guarantees.

The backdrop for investing in short-term secured loans remains very attractive. The strategy combines protection, high yields, short durations and very little correlation to traditional asset classes, which is especially valuable during times of rising interest rates and stock market volatility.
